1. Service availability (Uptime)

Ardoq will, during the subscription term, provide the Services with an availability target of 99.5% measured per calendar month, excluding Planned Downtime as defined below (the “**Availability Target**”).

If Ardoq does not meet its Availability Target, the Customer is entitled to a period of free extension of the Service as specified in the table below.

Customer must notify Ardoq of the failure to meet the Availability Target within 10 days after the end of the applicable calendar month, and must at the latest claim such free extensions within 30 days after the notification was sent to Ardoq.

| Availability per calendar month | Service credit |
|--|---------------------------------|
| 99.5 % - 99.0 % | 2 days extension of the Service |
| 98.9 % - 96.0 % | 4 days extension of the Service |
| <96.0 % | 8 days extension of the Service |

If the Service has not met the Availability Target for 3 consecutive months, Customer may terminate the Service upon 30 days’ notice to Ardoq, and will receive a pro rata refund of any prepaid fees for the unused period of Service. The foregoing are Customer’s sole remedies for any failure of the Service to meet the Availability Target. Ardoq’s monitoring and logging infrastructure will be the source of truth for determining availability.

Free, proof-of-concept, beta, trial Services or similar (“**Trial Services**”) are provided “as-is” without any guarantees, service level commitments or liability. The Customer uses the Trial Services at its own risk. Ardoq shall not be liable for any loss or damage arising from the use of or inability to use the Trial Services. Ardoq reserves the right to decommission any Trial Services at any time without prior notice. Ardoq may impose fees on the Trial Services at any time. In such event, the Trial Services will remain available to Customer only if Customer accepts the fees in writing. Should

Customer not accept the fees, Ardoq will remove access to the relevant Trial Services as soon as the fees come into effect.

2. Planned downtime

Downtime may be necessary to perform updates or maintenance to hardware or software from time to time (“**Planned Downtime**”). Ardoq may have Planned Downtime up to 4 times each calendar year. Ardoq will, if possible, notify Customer at least 5 business days in advance of Planned Downtime occurring outside of normal business hours (Monday to Friday 0900-1700 CET for the EU datacenter and Monday to Friday 0900 – 1700 US Eastern Time for the US Data Center). For planned downtime (which may last for up to 24 hours) during normal business hours, notification shall be given at least ten (10) business days in advance if possible. Planned Downtime according to this clause is not considered as unavailability.

3. Customer Support – Technical Support

Customer will have 24/7 access to the Ardoq online Knowledge Base. Customer support is offered through the in-app chat or by sending an email to support@ardoq.com. Support is provided to the extent included in the customer's subscription plan.

Ardoq’s customer support processes all incoming support requests from the Customer. In cases where escalation is necessary, the Customer can reach out to its Customer Success Manager. For support purposes, Ardoq has internal administrators who can access Customer’s data. Logs are kept of any access by Ardoq administrators.

Ardoq customer support is offered in English and Norwegian.

4. Functionality, modifications and improvements

The Service is provided "as is" as a standardized service; the right to use the Service is not conditional or tied to a specific version or functionality at a certain time. Ardoq reserves the right to make improvements, to add, modify or remove functionality, and to correct any errors or defects in the Service at its sole discretion, without any obligation or liability. Ardoq will, however, not remove functionality which, in Ardoq’s reasonable opinion, is considered core functionality for a service such as the Service. The Service will not always be completely free of errors and the improvement of the Service is a continuous process.

5. System requirements

- Safari: Latest stable version supported

The following system requirements are recommended for best performance:

Ardoq is not liable for the discontinuance, disruption or instability of the operation of the Service caused by the Internet or any third party service the Customer needs in order to access the Service, including, without limitation, operating systems and necessary application software.

6. Disclaimers related to AI-based functionalities

The Ardoq Services may, depending on the Customer's subscription plan, utilize AI or similar technology. If such functionalities generate content and/or output based on Customer Data, the Customer accepts that such generated content and output:

1. are generated through machine learning and are not reviewed, verified or curated by Ardoq;
2. may not be complete, accurate or correct and require Customer's independent verification before their use;
3. may be generic, similar or identical to content/output produced for other Ardoq customers.

APPENDIX 2

The Data Processor shall remain fully liable to the Data Controller for the performance of any sub-processors.

5. TRANSFERS OF GDPR PERSONAL DATA

The Data Processor uses the respective sub-processors outside the EEA (including the EU), UK and Switzerland (collectively the "**GDPR Area**"), as documented in section 4.

Apart from this, for the processing of personal data on behalf of Data Controller as described herein, to the extent such processing is subject to GDPR, the Data Processor may not transfer such personal data outside the GDPR Area, unless it has ensured that there is a legal basis for

the transfer of such personal data outside the GDPR Area or unless required by mandatory provisions of applicable law.

6. SECURITY

The Data Processor shall through planned and systematic measures implement appropriate technical and organizational measures to ensure a satisfactory level of security, e.g. in relation to confidentiality, integrity and availability.

The Data Processor shall document routines and other measures made to comply with these requirements regarding the information system and security measures. The documentation shall be available at request by the Data Controller and the authorities.

Any notification to the authorities regarding personal data breaches shall be given by the Data Controller, but the Data Processor shall notify any breach directly to the Data Controller. The Data Controller is responsible for reporting the breach to the Data Protection Authorities.

The Data Processor's obligations to assist the Data Controller in fulfilling the obligations concerning security of processing and consulting supervisory authorities, are considered fulfilled by the Data Processor's obligations according to this DPA. Considering the nature of the processing performed by the Data Processor, as well as that the Data Processor's service is of a self-service nature where all data input into the service is administrated directly by the Data Controller, and the limited information available to Data Processor, this assistance is considered sufficient. To the extent the Data Controller requires additional assistance from the Data Processor, the Data Processor may offer such assistance as a separately paid service. The Data Processor may also refuse, unless the Data Processor's assistance is necessary to be able to fulfil Data Controller's GDPR obligations.

7. DOCUMENTATION AND SECURITY AUDITS

The Data Processor shall have documentation that proves that the Data Processor complies with its obligations under this DPA and the GDPR. The documentation shall be available for the Data Controller on request. The Data Processor shall regularly conduct security audits, and shall submit the results of the audit to the Data Controller. The Data Controller shall be entitled to conduct audits and inspections regularly, for systems etc. covered by this DPA, in accordance with the applicable requirements of the GDPR. Audits may be carried out by the Data Controller or a third party mandated by the Data Controller in agreement with the Data Processor. To the extent the Data Controller requires additional assistance from the Data Processor, the Data

Processor may offer such assistance as a separately paid service. The Data Processor may also refuse, unless the Data Processor's assistance is necessary in order to be able to fulfil Data Controller's GDPR obligations.

8. FULFILLING THE RIGHTS OF THE DATA SUBJECTS

The Data Processor's processing on behalf of the Data Controller is not of a nature which makes it necessary or reasonable for the Data Processor to fulfil or assist in fulfilling the Data Controller's obligations towards data subjects. To the extent the Data Controller requires assistance from the Data Processor, the Data Processor may offer such assistance as a separately paid service. The Data Processor may also refuse, unless the Data Processor's assistance is necessary to be able to fulfil Data Controller's GDPR obligations.

9. THE DURATION OF THE DPA AND THE PROCESSING

The DPA applies as long as the Data Processor processes personal data on behalf of the Data Controller in connection with providing the Service to the Data Controller.

10. TERMINATION

The DPA may only be terminated together with the Agreement, in accordance with the termination clauses in the subscription terms. Termination of the subscription terms also constitutes a termination of the DPA.

11. RETURN, DELETION AND/OR DESTRUCTION OF DATA UPON TERMINATION OF THE DPA

The Data Processor provides a standardized format to export the Data Controller's data via the built-in export function in the Service. This function may be used by Data Controller during the term of the Agreement.

Upon termination of the Agreement, the Data Processor will permanently erase all personal data processed hereunder on behalf of the Data Controller in accordance with its corporate deletion policy, unless the Data Processor is required by law to store any such data.
