

5 Steps to a QUICK START

1

Onboard and Configure

Use our pre-configured Quick Start templates and workflows to set up your Ardoq instance.

Our guided onboarding process is easy to follow so you'll be ready to go quickly.

2

Prepare Your Data

Collect the necessary data, like an IT asset list, using simple templates provided by Ardoq Quick Start.

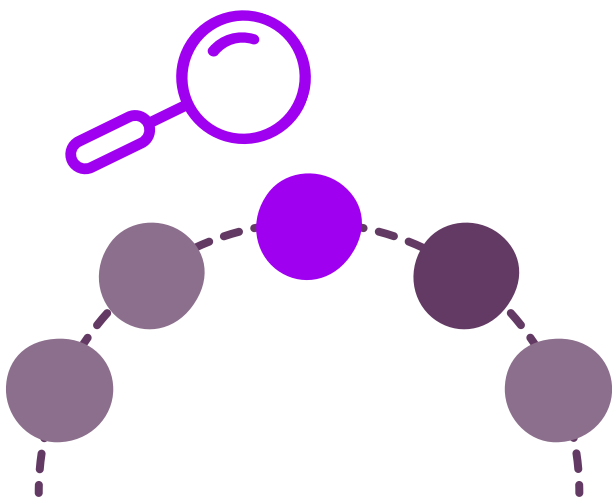

This step ensures a smooth setup.

3

Gain Visibility

Use Quick Start's structured, assisted approach with easy, preconfigured surveys to enrich your IT overview with key attributes such as owners, costs and health scores.

Complement it with an understanding of how your apps serve the business

4

Identify Redundant Apps

Identify unnecessary apps, freeing up budget and reducing IT complexity. This step uncovers quick cost savings.

5

Share the good news

In 30 days, you'll see real results. You'll have control over your IT and know exactly how to make things better. Once it's optimized, your team will be ready for whatever comes next.
