

Ardoq

# Quick Start

From Complexity to Clarity in **30 days**

## What is Quick Start?

Quick Start is the **ideal choice** for companies that want to streamline and reduce unnecessary IT fast. Quick Start offers customers the chance to:

- Gain full visibility into the IT landscape
- Understand how IT serves business
- Identify quick wins to optimize budget
- Simplify governance

## What's included?

- **Easy to Follow Guidance:** Clear steps make things simple and help you get value quickly.
- **Pre-Configured Templates:** Pre-built metamodel and visualizations.
- **Simplified Onboarding:** A simple, focused plan with special training to get quick results and reduce IT headaches.
- **Broadcasts:** Automate surveys to keep data current.
- **3 Admin Users**
- **10 Ardoq Core Quick Start users**
- **20 Ardoq Discover Monthly User Licenses:** Give access to non-technical users for exploring insights on their own, with easy-to-understand dashboards.

## What will you achieve?

- **Visibility:** Find out exactly what IT systems you have, their associated costs, and who owns them.
- **An IT health check:** Assess technical vs. business fit of your IT infrastructure.
- **Redundant spend insights:** Eliminate waste.

## What kind of business is Quick Start built for?

### LOW COST, FAST OUTCOMES

Companies looking for a fast way to remove unnecessary IT and streamline operations.

### APP RATIONALIZATION

Businesses that need quick wins and want to start with application rationalization.

### RAPID ARCHITECTURE

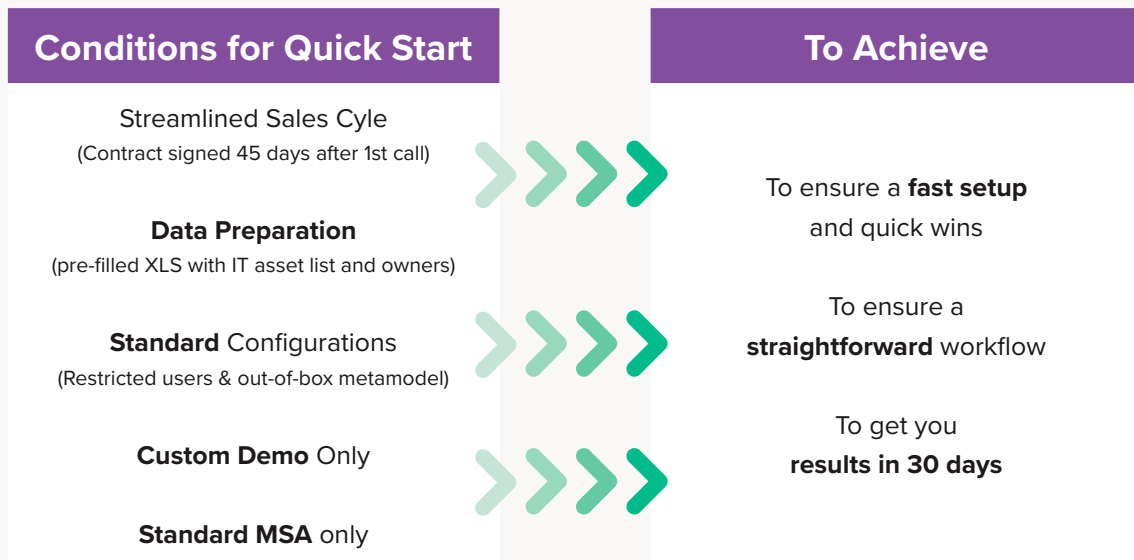

Ideal for organizations needing a low-touch solution. Quick Start is easy to implement with structured playbooks out-of-box.

Untangle your IT with **Ardoq**
